

REASONS TO LOVE MY26 INTEGRA

Aggressive Style, Dynamic Performance And Advanced Technology Energize Integra.

Integra is one of the Acura brand's most iconic nameplates, reimagined for a new generation of drivers with a fresh, fun-to-drive spirit and sleek liftback design. Here's how the Integra's 2026 model line appeals to a broad range of enthusiastic drivers...

BOOST YOUR EXPECTATIONS

The Integra's **VTEC® 1.5-liter turbocharged engine** has 200 horsepower (SAE net) and 192 lb-ft of torque (SAE net) for strong acceleration and an enthusiastic top-end rush. The boost hits fast, then lasts.

It's paired with an automatic transmission (CVT) that responds intuitively to every touch of the accelerator pedal or standard steering **wheel-mounted paddle shifters**.

Rather do it yourself? A segment-exclusive available 6-speed manual transmission has short throws and snugly spaced ratios. **Automatic rev-matching** is sure to trigger shifting nirvana.

A **helical limited-slip differential (LSD)** is paired with the manual to maximize available traction when accelerating out of corners - for less slip, more rip.

CONNECT WITH THE ROAD

Class-leading driving dynamics, an exceptionally rigid body and **sport-tuned independent suspension** deliver precise, agile handling. The cushy ride is an extra bonus.

Choose your driving mode with the standard **Integrated Dynamics System (IDS)**. A-Spec® with Technology Package adds adjustments for in-cabin sound, an **Adaptive Damper System (ADS)** with three distinct profiles, and Individual Mode that lets you mix and match settings. It's all up to you.

PURE EYE CANDY

The Integra's segment-leading technology includes a standard **10.2-inch Acura Precision Cockpit™ digital gauge cluster** with multiple display modes and a **9-inch digital touchscreen** with wireless **Apple CarPlay®** and **Android Auto™** compatibility.

The 9-inch touchscreen features wireless Apple CarPlay® and Android Auto™ compatibility. **Wireless phone charging** is standard, too. Step up to the Technology Package, and enjoy **Alexa Built-In** and a **5.3-inch Head-Up Display (HUD)**. It's all technology that keeps you connected and in control.

A STUNNING SOUNDTRACK

In the Integra, the standard premium audio system features eight speakers. For even more realism, the available **16-speaker ELS STUDIO 3D® Premium Audio System** adds a new dimension with two Highline™ speakers mounted in the headliner above the front seat passengers. There are also four tweeters, four full-range speakers, three mid-range speakers and two satellite speakers – plus a rear-mounted subwoofer – to completely envelop you in sound.

Named for multi-Grammy® Award-winning producer/engineer Elliot Scheiner, the system has amazing detail and clarity – and impressive power.

SLIP INTO SOMETHING MORE COMFORTABLE

Inside, the Integra has a **sporty and tailored cabin** with high-quality materials and premium touchpoints.

A standard deeply bolstered heated **8-way power driver's seat** helps you feel comfortably secure in aggressive cornering. The available Technology Package adds a **12-way power driver's seat** and 4-way power front passenger seat – as well as Microsuede-Trimmed Front Seats.

The Integra's **low cowl and thin roof pillars** create exceptional visibility. Expect no complaints from the backseat crew, with **generous legroom** that lets passengers sprawl out.

POP THE HATCH

The Integra features **sporty and compact proportions** inspired by previous Integras, specifically the OG 5-door model that helped launch the Acura brand in 1986. Respect.

The Integra combines a coupe-like profile with surprising flexibility thanks to its **5-door liftback design** – unique in the premium sport compact segment. A clever **built-in cargo cover** helps conceal your gear.

Need more space? Integra's **60/40 split rear seatbacks fold flat** to expand the cargo area. Load up and roll.

CONFIDENCE IS STANDARD

With its Acura **Advanced Compatibility Engineering™ (ACE™) body structure**, the Integra offers state-of-the-art safety technology.

New-generation driver and passenger front airbags are designed to cradle the head and reduce the risk of brain injuries, especially in offset collisions.

Integra's standard **AcuraWatch™ suite** of driver assistive and safety technologies features a single-camera system with a wide field of view and long range so the **Collision Mitigation Braking System™ (CMBST™)** can distinguish between vehicles, pedestrians and even bicycles.

Every Integra has a **standard blind spot information system (BSI)** with **Rear Cross-Traffic Monitoring**. Integra A-Spec® with Technology Package includes **front and rear parking sensors** and **Low-Speed Braking Control (LSBC)**.

A QUARTET OF GREAT CHOICES

The Integra line offers four mouthwatering flavors:

INTEGRA

INTEGRA

Exceptionally well equipped, the Integra hits a sweet spot with a long list of standard features that includes a powerful turbocharged engine, CVT automatic transmission, 9-inch touchscreen display and much more.

A-SPEC

Ready for something extra? Integra A-Spec delivers with a Sport Appearance Package, LED fog lights, and upgraded 18-inch wheels and tires.

+ Technology

A-SPEC WITH TECHNOLOGY PACKAGE

The Integra A-Spec with Technology Package adds front and rear parking sensors, upgraded IDS with Adaptive Damper System, available 6-speed manual transmission, 16-speaker ELS STUDIO®3D Premium Audio System, Head-Up Display and more.

TYPE S

The 2026 Integra Type S: the ultimate in street performance from Acura. With a much larger engine, lot's more power and radically upgraded suspension, brakes and wheels, it's the ultimate ride for enthusiast drivers. Get the whole story here: [2026 Integra Type S Reasons To Love.](#)
